
THUNDERBIRD NATIVE TITLE UPDATE

Sheffield Resources Limited (“Sheffield”, “the Company”) (ASX: SFX) is pleased to update the market on the Native Title process for its 100% owned Thunderbird Mineral Sands Project located near Derby in northern Western Australia.

A National Native Title Tribunal (NNTT) hearing took place earlier today. The Tribunal has reserved its decision as is procedure, and a decision will be handed down by the Tribunal in due course.

Sheffield will continue to advise the community and shareholders of further developments as they arise.

ABOUT SHEFFIELD RESOURCES

Sheffield Resources Limited is focused on developing its 100% owned, world class Thunderbird Mineral Sands Project, located in north-west Western Australia. Sheffield continues to also assess other regional exploration opportunities.

THUNDERBIRD MINERAL SANDS

Thunderbird is one of the largest and highest grade mineral sands discoveries in the last 30 years.

Sheffield's Bankable Feasibility Study shows Thunderbird is a technically low risk, modest capex project that generates strong cash margins from globally significant levels of production over an exceptionally long mine life of 42 years.

Thunderbird will generate a high-quality suite of mineral sands products with specifications suited to market requirements. These products include Premium Zircon suitable for the ceramic sector and LTR Ilmenite which will be one of the highest-grade sulfate feedstocks available globally.

Thunderbird is located in one of the world's most attractive mining investment jurisdictions and is well placed to deliver long term, secure supply of high quality products to a range of potential customers.

Subject to permitting activities, the Company is targeting initial production in 2020. The initial planned production profile is aligned with expected emerging supply gaps in global mineral sands markets.
